- 3 The Tire Pressure Monitoring System (TPMS) initialization must be performed so that the system operates normally (if equipped).
- 4 Reset the engine oil data after replacing the engine oil. For SKYACTIV-G 2.5 (Non-Turbo) use SAE 0W-20 engine oil and SKYACTIV-G 2.5T (Turbo) use SAE 5W-30 engine oil. Mazda Genuine Oil is used in your Mazda vehicle and is required to help achieve optimum fuel economy.
- 5 According to state/provincial and federal regulations, failure to perform maintenance on these items will not void your emissions warranties. However, Mazda recommends that all maintenance services be performed at the recommended kilometre period to ensure long-term reliability.
- 6 2.5L Turbo only
- 7 2.5L Non-Turbo only
- 8 Maximum interval, whichever comes first. Use of FL-22 is recommended when replacing engine coolant. Using engine coolant other than FL-22 may cause serious damage to the engine and cooling system.

- 10 Refer to your warranty information booklet.
- 11 Alignments are not part of your regular scheduled maintenance, but an additional service. Requirements are subject to road conditions experienced while driving.
